## EMPLOYEE OF THE MONTH

### Kelly Hornsby

We would like to recognize Kelly Hornsby as our longest standing employee. She has TRULY been with us from the beginning! We genuinely appreciate all of her hard work and dedication. She has only missed two days in thirteen years!! In her spare time, she loves to spend time with her family and friends.

## this issue

Important Days in January **S.1**

Employee Birthdays **S.2**

Employee of the Month **S.3**

National Radon Action Month **S.4**

Air Duct Cleaning **S.5**

## January is National Radon Action Month.

**Radon is the number one cause of lung cancer among non-smokers, according to EPA estimates. Overall, radon is the second leading cause of lung cancer.**

Four Things You Can Do During National Radon Action Month: 1) **Test your home** - EPA and the U.S. Surgeon General recommend that all homes in the U.S. be tested for radon. Testing is easy and inexpensive. Learn more about testing your home, including how to obtain an easy-to-use test kit.

2) **Attend a National Radon Action Month event in your area** - Look for radon events in your community. Contact your state radon program for more information about local radon activities. 3)

**Spread the word** - spend time during National Radon Action Month encouraging others to learn about radon and test their homes. 4) **Buy a radon-resistant home** - If you are considering buying a new home, look for builders who use radon-resistant new construction. Read more about radon-resistant new construction, "Building Radon Out: A Step-by-Step Guide to Build Radon-Resistant Homes". Contact your state radon program for information about radon testing, mitigation, and radon-resistant new construction

in your area. (All information regarding radon was retrieved from the EPA Website). For any inquiries and/or pricing about radon testing, call Ciocca Cleaning & Restoration. Our office number is (260) 483-2112.

## Air Duct Cleaning

### Why clean your air ducts? Indoor Air Quality

Many consider air duct cleaning vital to maintain healthy indoor air. Dust, allergens (pollen, pet dander) and toxins (mold, mildew, and rodent droppings) are commonly found in air ducts. If air ducts are not cleaned regularly these particles can be released into your home. Even if family members do not suffer from allergies the particles can cause severe respiratory problems, among other things.

### Why clean your air ducts? Allergies

If family members suffer from allergies, air duct cleaning may be necessary to provide a safe haven for allergy sufferers. Air duct cleaning can drastically reduce the amount of allergens that are present in a home. **We do air duct cleaning! Call us today!!**
