Goodbye Amanda

Amanda began her career with Ciocca Cleaning & Restoration in 2003, when Ciocca Cleaning & Restoration acquired the Restoration Division. Since then, she has been invaluable in her role as Director of Client Relations. Most recently she has worked very closely with our Insurance Partners, Continuing Education classes, and staff training for our Medical Janitorial Division.

Amanda graduated from nursing school in May 2011. Amanda passed her state board exam, and received her nursing license in August, and started working as an RN at a local hospital, shortly thereafter. She continued to work at Ciocca Cleaning & Restoration part-time until her last day, December 30, 2011.

Everyone at Ciocca Cleaning & Restoration wish Amanda all the best in her new Career! She will be missed!

Frozen Water Pipe Prevention

We have experienced a fairly warm winter to date, which we know can change very quickly. Now is a great time to review frozen water pipe prevention.

The cause of frozen pipes are when water freezes in your pipes, it creates a blockage. If this blockage is not discovered and expands enough, your pipes will burst. This can cause serious water damage inside of your home.

You can take precautions to help in preventing frozen water pipes by insulating pipes in your crawl space and attic. You can also let a faucet drip during extremely cold weather. This will relief the pressure between the faucet and the ice blockage when freezing occurs. If you are planning on being away from your home for an extended period of time, on vacation or otherwise, drain the water from your pipes, and have your home checked periodically while you are gone.

If you or someone you know does have an unfortunate accident Resulting from a pipe burst, call Ciocca Cleaning & Restoration right away!
