## IMPORTANT DAYS IN June

June 5 World Environment Day  
June 14 Flag Day  
June 17 Father's Day  
June 20 First Day of Summer

## EMPLOYEE OF THE MONTH

Bryan Werling

Bryan has been a valued employee since November 2011. He works in Client Relations within our Restoration Division and is also one of our estimator's. Bryan is a focused team player. He is willing to assist others, stays to finish a job, and often assists in other areas! We have received several very positive communications from Homeowners and area Business Leaders, concerning Bryan.

Bryan is a true asset to our Company!

### Vomac

Ciocca Cleaning & Restoration is pleased to include Vomac, into the Janitorial Services Family. We look forward to a long term relationship with them!

### Window Cleaning Squeegee

The single-blade window cleaning squeegee was invented in 1936 by Ettore Sceccone.

Ettore is one of the premiere brands of window cleaning squeegees used by professionals today.

## Ciocca Window Cleaning Service

### *Did you know Ciocca Cleaning & Restoration cleans windows?*

We clean all types of windows and glass, using window cleaning products and professional window cleaning tools.

### *Our process*

Our first step is to wet the entire window with our soft washer with window washing solution. After wetting the window, we will carefully remove stuck on items, such as bugs, bird droppings, tree sap, or any other items that have found their way to the surface of your window, with a razor scraper. Once the window has been carefully scraped clean, we will once again wet the window using our scrubbing washer and gently scrub the remaining dirt from the window. We now use the squeegee to remove as much of the remaining moisture on the window as possible.

### *Our finishing touches*

We finish each window by drying the edges and window sills. We also dry exterior door handles when cleaning the glass on doors.

## June is National Safety Month

Each June, the National Safety Council encourages organizations to get involved and participate in National Safety Month. National Safety Month is an annual observance to educate and influence behaviors around the leading causes of preventable injuries and deaths. This year's observance highlights the need to practice safe behaviors 24/7, as three times as many employees are injured off the job than while at work. Each week carries a theme that brings attention to critical safety issues.

- Employee Wellness – June 3 to 9
  - If people made the choices to eat better, engage in more physical activity and quit smoking, at least 80% of all heart disease, stroke and type 2 diabetes – and up to 40% of cancer – could be prevented, according to the World Health Organization.
- Ergonomics – June 10 to 16
  - Ergonomics involves designing the job environment to fit the person and is important to take into consideration at work, but also while working on projects at home. It's about learning how to work smarter and preventing conditions such as overexertion.
- Preventing Slips, Trips and Falls – June 17 to 23
  - Most falls are preventable. Many people attribute falls to being clumsy or not paying attention, but many risk factors exist. Risk factors include physical hazards in the environment, age-related issues and health conditions. Reduce your risk and find fall hazards in your workplace and home to prevent injuries and keep others safe round the clock.
- Driving Safety – June 24 to 30
  - Driving is one of the most dangerous activities you will do each day. As traffic on the roads increases during the summer months, keep in mind tips on issues such cell phone distracted driving, safety belt use, impaired driving and aggressive driving to stay safe when driving for work or pleasure.
